

# INDEX OF SUBJECTS

- Abnormality, growth—acute**  
    leukemia ..... 45a\*
- Abscess—liver** ..... 36a\*
- Acid mucopolysaccharide—storage**  
    disease; corneal fibroblast ..... 20a\*
- Acid phosphatase**  
    bone marrow ..... 48i  
    neuron, Tay-Sachs disease ..... 38a\*
- Acute leukemia—growth**  
    abnormality in ..... 45a\*
- Adenoma, pituitary—argentaffin**  
    cells ..... 35a\*
- Adenosinetriphosphatase—heart** . 49i
- Adrenal**  
    glucocorticosteroids—  
        inflammation ..... 763  
        in rapid death and chronic illness .. 113
- Age**  
    arterial wall ..... 3a\*; 34a\*  
    prostatic epithelium ..... 37a\*
- Alcoholic cirrhosis—macrophage**  
    and hepatocyte metabolism .... 35a\*
- Alcoholic hepatitis** ..... 24a\*
- mitochondrial crystalloids** ..... 26a\*
- Alcoholic hyalin—electron**  
    microscopy ..... 44i
- Alcoholism, chronic—**  
    mitochondria, liver ..... 645
- Allergic encephalomyelitis—rat** .. 299
- Alpha-naphthyl isothiocyanate—**  
    rat ..... 947
- Altitude—cardiac hypertrophy** .... 6a\*
- Alveolus—lining layer; lung**  
    surfactant ..... 7a\*
- Alzheimer's presenile dementia** .. 269
- American Association of**  
    Pathologists and  
    Bacteriologists, Proceedings . 983
- Amino-nitrile—vascular injury,**  
    rabbit ..... 247
- Amino-peptidase activity—**  
    myocardium ..... 867
- Amnion cells (FL)—tumor**  
    formation ..... 507
- Amphotericin B—nephropathy;**  
    cellular injury ..... 32a\*
- Amyloid**  
    murine, casein-induced ..... 15a\*  
    similarity to cellulose ..... 42a\*
- Amyloidosis**  
    alkaline Congo red and thioflavine  
        T stains ..... 15a\*  
    experimental—liver ..... 629  
    spontaneous—duck ..... 42a\*
- Anaphylactic shock—antigen-**  
    antibody precipitation ..... 889
- Anoxic ischemia—cerebral cortex,**  
    rat ..... 53i
- Antibody**  
    fluorescent—fibrin in  
        atherosclerotic plaque ..... 255  
    formation—fetal opossum ..... 2a\*
- Anticonvulsant agent—liver**  
    change ..... 30a\*
- Antigen**  
    bacterial—lymphatic tissue  
        response ..... 747  
    tritiated—cellular distribution ... 44i
- Antigen-antibody precipitate—**  
    anaphylaxis ..... 889
- Aorta**  
    atheroma—autoradiography ..... 877  
    calcification—x-ray microscopy .. 4a\*
- Argentaffin cells—hypophysis,**  
    normal, and pituitary adenoma . 35a\*
- Arterial wall—age and atheroma** .. 34a\*
- Arteries**  
    age and atheroma ..... 3a\*  
    coronary—collateral circulation .. 39a\*  
    pulmonary—protamine effect .... 8a\*
- Arteriosclerosis—hyaline, renal** . 349
- Arteriosclerosis—fibrosis and lipid**  
    accumulation ..... 33a\*
- Asibi strain, yellow fever virus—**  
    in liver and tissue culture cells .. 9a\*
- Atheroma**  
    age and arterial wall ..... 3a\*  
    aorta—autoradiography ..... 877  
    arterial wall ..... 34a\*
- Atherosclerosis**  
    cholesterol-induced, rabbit ..... 247  
    fibrin in white plaque ..... 255  
    proteolytic enzymes ..... 40a\*
- Autolysis—lysosomes, role of** ..... 23a\*
- Autoradiography**  
    aorta ..... 877  
    renal tubules—hypertensive  
        nephropathy, rat ..... 41a\*
- Bacterial antigen—lymphatic tissue**  
    response ..... 747

\* Abstract of paper presented at the Sixty-first Annual Meeting of the American Association of Pathologists and Bacteriologists, Chicago, Illinois, April 3, 4 and 5, 1964.

- Barometric pressure, normal—**  
  high altitude cardiac hypertrophy ..... 6a\*
- Basic protein—in leukocytes** ..... 905
- B-b'-iminodipropionitrile—**  
  neuroaxonal alterations, rat ..... 23a\*
- Bence-Jones proteins,**  
  immunologic types—reduction fragments, 7S gamma globulin .. 3a\*
- Beta-galactosidase—lymphatic system** ..... 41a\*
- Bisdiazobenzidine-human gamma globulin—lymphocytes** ..... 41a\*
- Blood**  
  tritiated endotoxin ..... 401  
  white cell content in lymphoma and leukemia ..... 35a\*
- Blood cells—homograft reactions *in vitro*** ..... 43a\*
- Blood flow, pulmonary—**  
  respiration in newborn ..... 46a\*
- Blood-tissue barrier—acute inflammation** ..... 1a\*
- Bone**  
  osteosclerosis in renal disease ..... 141  
  sodium molybdate effect, rat ..... 21a\*
- Bone marrow—fibroblast-like cells** ..... 481
- Brain**  
  allergic encephalomyelitis, rat ..... 299  
  anoxic ischemia, rat ..... 531  
  intracranial tumor—chromosome patterns ..... 18a\*
- Bunamiodyl—renal effects** ..... 13a\*
- Calcification**  
  aorta—x-ray microscopy ..... 4a\*  
  kidney—electron microscopy ..... 365
- Calcinosis, tumoral—connective tissue** ..... 41a\*
- Cancer—lung; histochemistry** ..... 39a\*
- Capillary—glomerulus; lesions in renal disease** ..... 13a\*
- Capillary bed—cerebral cortex, rat, in anoxic ischemia** ..... 531
- Carbon tetrachloride**  
  cirrhosis—regenerative nodules .. 31a\*  
  ribosomes, effect on; rodent and primate ..... 28a\*
- Cardiac hypertrophy, high altitude—effect of normal barometric pressure** ..... 6a\*
- Cardiac muscle—**  
  adenosinetriphosphatase ..... 491
- Casein—murine amyloid** ..... 15a\*
- Cell proliferation—hydronephrosis, rat** ..... 961
- Cells—on intravascular dacron hub** ..... 5a\*
- Cellular effect—radiation** ..... 727
- Cellular injury**  
  amphotericin B ..... 32a\*  
  deuterium intoxication ..... 12a\*  
  lysosomes ..... 24a\*  
  polyoma virus ..... 26a\*  
  symposium ..... 23a\*
- Cellulose—similarity to amyloid** .. 42a\*
- Cerebral cortex—anoxic ischemia, rat** ..... 531
- Chemical injury—cells** ..... 24a\*
- Chemistry—sphingolipidoses** ..... 22a\*
- Chemoblastomatosis** ..... 17a\*
- Chick embryo—heart size and incubation temperature** ..... 6a\*
- Childhood—growth abnormality in acute leukemia** ..... 45a\*
- Children—renal disease and osteosclerosis** ..... 141
- Cholecystography—bunamiodyl; renal effects** ..... 13a\*
- Cholestasis—ductular cells, pinocytotic activity** ..... 9a\*
- Cholesterol—atherosclerosis, rabbit** ..... 247
- Cholesterol-4-C<sup>14</sup>—in atheroma** ... 877
- Choroid plexus—hyaline membrane disease** ..... 45a\*
- Chronic illness—adrenal** ..... 113
- Chronic pyelonephritis—rat** ..... 679
- Cirrhosis**  
  alcoholic—macrophage and hepatocyte metabolism ..... 35a\*  
  hepatic vasculature ..... 10a\*  
  regenerative nodules; lamellar structures in ..... 31a\*
- Coagulative necrosis—kidney; di-serine-induced** ..... 383
- Collagen, uterine—postpartum resorption** ..... 27a\*
- Collateral circulation—swine** ..... 39a\*
- Compensatory hyperplasia—kidney** ..... 961
- Congo red stain—dichroism of amyloid** ..... 15a\*
- Connective tissue—tumoral calcinosis** ..... 41a\*
- Convolute tubules, proximal—mercuric chloride, sublethal dose** ..... 31a\*
- Cornea—macular dystrophy** ..... 20a\*
- Corneal fibroblast—acid mucopolysaccharide storage disease** ..... 20a\*
- Coronary arteries—collateral circulation after ligation, narrowing, vasodilation** ..... 39a\*
- Cortisone**  
  pulmonary epithelial hyperplasia . 8a\*  
  treatment—mouse ..... 507

- Coxsackie virus B3—myocarditis, mouse ..... 775  
 Crystal formation—mouse polioencephalitis virus ..... 29  
 Crystalloids, mitochondrial—alcoholic hepatitis ..... 26a\*  
 Cytochemistry—thyroiditis, guinea pig ..... 20a\*  
 Cytomegalovirus infection—hepatic parenchyma, mouse .43a\* 799  
 Cytopathic effect—ECHO-9 virus, tissue culture ..... 1  
 Dacron hub, intravascular ..... 5a\*  
 Death, rapid—adrenal ..... 113  
 Deficiency—vitamin B<sub>12</sub>, rat ..... 73  
 Degeneration—pancreas, rat; soluble fraction changes ..... 29a\*  
 Dementia, Alzheimer's ..... 269  
 Deoxyribonucleic acid—incorporation of thymidine, mouse organs ..... 16a\*  
 Deuterium—cell damage ..... 12a\*  
 Diabetes mellitus—diet, Egyptian sand rat ..... 20a\*  
 Diabetic glomerulosclerosis—rat . 34a\*  
 Diabetic nephropathy ..... 155  
 Diagnosis  
   amyloidosis—alkaline Congo red and thioflavine T ..... 15a\*  
   renal disease—immunofluorescent histology ..... 14a\*  
 Diet  
   diabetes mellitus, Egyptian sand rat ..... 20a\*  
   meat—mandible and teeth, rat, effect on ..... 85  
   sodium molybdate and skeletal deformity, rat ..... 21a\*  
 Dichroism—amyloid; Congo red stain ..... 15a\*  
 Diploid karyotypes—intracranial tumor ..... 18a\*  
 Dissecting microscope—sprue .... 585  
 Diversification, tumor—“progressive” malignancy ..... 19a\*  
 Dizygotic twins—prenatal development ..... 22a\*  
 dl-Serine—renal necrosis ..... 383  
 Dog  
   heart muscle ..... 491  
   kidney—irradiation ..... 707  
 Duck—spontaneous amyloidosis ... 42a\*  
 Ductular cells—normal and cholestatic liver; pinocytotic activity ..... 9a\*  
 Ductular ectasia—pancreas ..... 973  
 Dystrophy  
   macular, corneal ..... 20a\*  
   muscular—lipid ..... 21a\*  
   —mouse ..... 931  
 ECHO-9 virus—tissue culture ...1; 215  
 Ectasia, ductular—pancreas ..... 973  
 Egyptian sand rat—diabetes mellitus ..... 20a\*  
 Electron microscopy  
   acid phosphatase in neurons, Tay-Sachs disease ..... 38a\*  
   adenosinetriphosphatase in cardiac muscle ..... 491  
   alcoholic hyalin ..... 441  
   allergic encephalomyelitis, rat ... 299  
   Alzheimer's disease ..... 269  
   amyloid, murine, casein-induced .. 15a\*  
   amyloidosis, liver ..... 629  
   anaphylactic shock ..... 889  
   arteriosclerosis ..... 33a\*  
   atherosclerosis ..... 40a\*  
   blood-tissue barrier in acute inflammation ..... 1a\*  
   cells on intravascular dacron hub . 5a\*  
   cerebral cortex, rat ..... 531  
   Coxsackie myocarditis ..... 775  
   cytomegalovirus infection, hepatic parenchyma, mouse ..... .43a\*; 799  
   diabetic nephropathy ..... 155  
   dl-serine intoxication ..... 383  
   fatty liver ..... 645  
   glomerular capillary wall lesions .. 13a\*  
   hepatitis, acute, alcoholic ..... 24a\*  
   homograft reaction ..... 319  
   hyaline arteriolosclerosis ..... 349  
   islet cell tumor ..... 663  
   leukoencephalopathy ..... 565  
   liver—anticonvulsant agent ..... 30a\*  
   —ethionine intoxication, rat ..... 169  
   —fatty ..... 645  
   —hepatitis, acute, alcoholic ..... 24a\*  
   —N-2-fluorenyldiacetamide ..... 455  
   —protein deficiency ..... 25a\*  
   myocardial necrosis—papain ..... 26a\*  
   myocardium ..... 127  
   neuroaxon—b-b'-iminodipropionitrile-induced alterations, rat ..... 23a\*  
   onkocyte—salivary gland tumor .. 33a\*  
   pancreas, rabbit—kwashiorkor ... 95  
   polioencephalitis virus ..... 29  
   proximal convoluted tubules—mercuric chloride ..... 31a\*  
   psittacosis virus ..... 44a\*  
   rat hepatoma ..... 10a\*  
   renal calcification ..... 365  
   rheumatoid synovitis ..... 853  
   Schwann cells ..... 30a\*  
   senile plaques ..... 553  
   sphingolipidoses ..... 22a\*  
   thrombus organization, steroid-modified ..... 4a\*  
   thyroiditis, guinea pig ..... 20a\*  
   yellow fever virus, Asibi strain ... 9a\*  
 Encephalomyelitis, allergic—rat .. 299  
 Endemic goiter, Himalayan ..... 839

- Endogenous pathogen—malignant**  
 cell ..... 33a\*
- Endothelium—radiosensitivity** .... 17a\*
- Endotoxin**  
 leukocytosis, rabbit ..... 905  
 localization in blood ..... 401  
 tritiated—Shwartzman reaction .. 597
- Enterococcal pyelonephritis—rat** . 679
- Enzymes, proteolytic—**  
 atherosclerosis ..... 40a\*
- Enzymorphology—prostatic**  
 epithelium ..... 37a\*
- Epinephrine tolerance—**  
 Shwartzman phenomenon, effects  
 on ..... 431
- Epithelioid cell granuloma—pine**  
 pollen, lipid extracts ..... 38a\*
- Epithelium**  
 pulmonary—hyperplasia;  
 cortisone ..... 8a\*  
 radiosensitivity ..... 17a\*
- Esterase—bone marrow** ..... 481
- Ethionine**  
 intoxication—rat liver ..... 169  
 liver ribosomes ..... 28a\*  
 PAS-positive material and iron in  
 liver ..... 11a\*
- Exocrine pancreas—ductular**  
 ectasia ..... 973
- Exudate, inflammatory**  
 adrenal corticosteroids ..... 763  
 pyogenic stimulus ..... 61
- Fasting—fat metabolism, heart** .... 5a\*
- Fat—metabolism, heart; in fasting** . 5a\*
- Fatty metamorphosis—liver in**  
 chronic alcoholism ..... 645
- Fetus—prostatic epithelium** ..... 37a\*
- Fibrin—atherosclerosis** ..... 255
- Fibroblast, cornea—acid**  
 mucopolysaccharide storage  
 disease ..... 20a\*
- Fibroblast-like cells—bone**  
 marrow ..... 481
- Fibrosis—in arteriosclerosis** ..... 33a\*
- Fixation—influence of** ..... 823
- "Flaming cell"—multiple myeloma**. 18a\*
- Fluorescence—amyloid; thioflavine**  
 T stain ..... 15a\*
- Fluorescent antibody—fibrin in**  
 atherosclerotic white plaque ... 255
- Gamma globulin, 7S—reduction**  
 fragments ..... 3a\*
- Germfree mouse—lymphatic tissue**. 747
- Glomerulonephritis, membranous,**  
 idiopathic ..... 14a\*
- Glomerulosclerosis, diabetic—rat**. 34a\*
- Glomerulus**  
 capillary wall lesions in renal  
 disease ..... 13a\*  
 in obstructive jaundice ..... 12a\*
- Glucocorticosteroids, adrenal—**  
 inflammation ..... 763
- Glycolipidosis, histiocytic** ..... 40a\*
- Goiter, Himalayan** ..... 839
- Golden hamster—Shwartzman**  
 reaction ..... 613
- Granules, heterophil—in**  
 leukocytosis ..... 905
- Granuloma, epithelioid cell** ..... 38a\*
- Granulomatosis, Wegener's** ..... 7a\*
- Ground substance, pulmonary**  
 arteries—protamine ..... 8a\*
- Group A streptococci—M-protein**. 51
- Growth—abnormality in acute**  
 leukemia ..... 45a\*
- Guinea pig—thyroiditis** ..... 20a\*
- Hamster—Shwartzman reaction** ... 613
- Heart**  
 adenosinetriphosphatase ..... 491  
 Coxsackie myocarditis ..... 775  
 fat metabolism in fasting ..... 5a\*  
 high altitude hypertrophy ..... 6a\*  
 hypertrophy ..... 521  
 infarction ..... 867  
 myocardium—hemorrhagic shock . 127  
 —in open-heart surgery ..... 5a\*  
 —necrosis, papain-induced ..... 26a\*  
 size, chick embryo—incubation  
 temperature ..... 6a\*
- Hemic bed, spleen, liver—in**  
 lymphoma and leukemia ..... 35a\*
- Hemochromatosis—wine and iron**. 10a\*
- Hepatic siderosis—portacaval**  
 shunt ..... 11a\*
- Hepatic vasculature—cirrhosis** ... 10a\*
- Hepatitis, alcoholic**  
 acute ..... 24a\*  
 mitochondrial crystalloids ..... 26a\*
- Hepatocyte—metabolic mechanism;**  
 alcoholic cirrhosis ..... 35a\*
- Hepatoma—transplantable, rat** ... 10a\*
- Heterophils, rabbit—leukocytosis** . 905
- Himalayan endemic goiter** ..... 839
- Histiocytic glycolipidosis** ..... 40a\*
- Histochemistry**  
 aminopeptidase activity,  
 myocardium ..... 867  
 bone marrow ..... 481  
 chemoblastomatosis ..... 17a\*  
 ECHO-9 virus, tissue culture .... 215  
 lung cancer, undifferentiated .... 39a\*  
 myocardial change in open-heart  
 surgery ..... 5a\*  
 onkocyte—salivary gland tumor .. 33a\*  
 pancreas, rabbit ..... 95  
 radiated salivary glands and lymph  
 nodes ..... 16a\*  
 renal effects of bunamiodyl ..... 13a\*  
 renal tubules in hypertensive  
 nephropathy, rat ..... 41a\*  
 rheumatoid synovitis ..... 853

- Homograft reaction** ..... 319  
   blood cells *in vitro* ..... 43a\*  
**Hub, intravascular, dacron—cell**  
   growth ..... 5a\*  
**Human amnion cells, transformed**  
   —tumor formation ..... 507  
**Hyalin**  
   alcoholic ..... 44i  
   arteriosclerosis, kidney—electron  
     microscopy ..... 349  
**Hyaline membrane disease**  
   choroid plexus ..... 45a\*  
   fixation, influence of ..... 823  
**Hydronephrosis, experimental—**  
   rat ..... 96i  
**Hyperplasia—pulmonary**  
   epithelium; cortisone ..... 8a\*  
**Hyperplasia, renal,**  
   compensatory ..... 96i  
**Hypersensitivity reaction—**  
   anaphylaxis ..... 889  
**Hypertension, pulmonary,**  
   experimental ..... 37a\*  
**Hypertensive nephropathy—renal**  
   tubule regeneration ..... 41a\*  
**Hypertrophy, cardiac—high**  
   altitude ..... 6a\*  
**Hypertrophy, myocardial—rat** ... 52i  
**Hypophysis—argentaffin cells** ... 35a\*  
**Idiopathic membranous**  
   glomerulonephritis ..... 14a\*  
**Immunized mouse—tritiated**  
   antigen ..... 41i  
**Immunofluorescence**  
   Coxsackie myocarditis ..... 775  
   renal disease, diagnosis ..... 14a\*  
   yellow fever virus, Asibi strain ... 9a\*  
**Immunology—Bence-Jones**  
   proteins; reduction fragments, 7S  
     gamma globulin ..... 3a\*  
**Immunosuppressive therapy—**  
   pulmonary complications ..... 38a\*  
**Incubation temperature—heart**  
   size of chick embryo ..... 6a\*  
**Infant—prostatic epithelium** ..... 37a\*  
**Infarct—myocardium;**  
   aminopeptidase activity ..... 867  
**Infection**  
   cytomegalovirus—hepatic  
     parenchyma, mouse ..... 43a\*; 799  
   ECHO-9 virus ..... 1; 215  
   susceptibility to—RE blockade ... 2a\*  
**Inflammation, acute—blood-tissue**  
   barrier ..... 1a\*  
**Inflammatory exudate**  
   adrenal corticosteroids ..... 763  
   pyrogenic stimulus ..... 6i  
**Inherited disease—macular corneal**  
   dystrophy ..... 30a\*
- Injury**  
   cellular—chemically induced .... 24a\*  
   —polyoma virus ..... 26a\*  
   systemic—protein synthesis in  
     liver cells ..... 29a\*  
   uterine collagen resorption, effect  
     on ..... 27a\*  
**Intracranial tumor—chromosome**  
   patterns ..... 18a\*  
**Intramuscular bone formation** ... 507  
**Intravascular antigen-antibody**  
   precipitation—anaphylactic  
     shock ..... 889  
**Intravascular dacron hub—cell**  
   growth ..... 5a\*  
**Involution—lysosomes, roll of** .... 23a\*  
**Ionizing radiation—cellular effect..** 727  
**Iron**  
   hemochromatosis ..... 10a\*  
   liver—ethionine administration .. 11a\*  
**Irradiation**  
   epithelium and endothelium ..... 17a\*  
   kidney, dog ..... 707  
   salivary glands and lymph nodes,  
     rat ..... 16a\*  
   x-ray induced leukemia ..... 17a\*  
   (See also, *Radiation*)  
**Islet cell tumor—electron**  
   microscopy ..... 663  
**Jaundice, obstructive—glomerular**  
   changes ..... 12a\*  
**Karyotypes—pseudodiploid and**  
   near diploid; intracranial tumor. 18a\*  
**Kidney**  
   amphotericin B nephropathy .... 32a\*  
   calcification—electron microscopy. 365  
   coagulative necrosis, dl-serine-  
     induced ..... 383  
   cholecystographic medium  
     (bunamiodyl), effects of ..... 13a\*  
   diabetic glomerulosclerosis, rat ... 34a\*  
   diabetic nephropathy ..... 155  
   disease—immunofluorescence in  
     diagnosis ..... 14a\*  
     —osteosclerosis ..... 14i  
   glomerulus—capillary wall  
     lesions ..... 13a\*  
   —obstructive jaundice ..... 12a\*  
   hyaline arteriosclerosis ..... 349  
   hydronephrosis and compensatory  
     hyperplasia ..... 96i  
   hypertensive nephropathy ..... 41a\*  
   idiopathic membranous  
     glomerulonephritis ..... 14a\*  
   irradiation, dog ..... 707  
   lipoid nephrosis ..... 14a\*  
   mercuric chloride, sublethal dose.. 31a\*  
   metastatic calcification ..... 13a\*  
   pyelonephritis, rat ..... 679  
**Kwashiorkor—pancreas, rabbit** ... 95

- Lamellar structures—regenerative**  
 nodules, cirrhotic liver ..... 31a\*
- Leukemia**  
 acute—growth abnormality in .... 45a\*  
 disease duration and splenic,  
 hepatic and white cell  
 involvement ..... 35a\*  
 x-rays, induced by ..... 17a\*
- Leukocytes—mouse**  
 poliocencephalitis virus crystal .. 29
- Leukocytosis—endotoxin-induced,**  
 rabbit ..... 905
- Leukodystrophy, metachromatic**  
 —viscera ..... 921
- Leukoencephalopathy**  
 experimental—myelin;  
 phagocytosis and regeneration .. 565
- Levarterenol—rabbit, newborn .... 2a\***
- Lichen simplex chronicus ..... 36a\***
- Ligation, coronary arteries—**  
 collateral circulation ..... 39a\*
- Lipid**  
 accumulation in arteriosclerosis .. 33a\*  
 extracts, pine pollen—epithelioid  
 cell granuloma ..... 38a\*  
 muscle in muscular dystrophy ... 21a\*
- Lipoid nephrosis ..... 14a\***
- Liver**  
 abscess ..... 36a\*  
 alcoholic cirrhosis ..... 35a\*  
 alcoholic hepatitis—acute ..... 24a\*  
 —mitochondrial crystalloids ..... 26a\*  
 alcoholism, chronic ..... 645  
 amyloidosis ..... 629  
 anticonvulsant agent, changes  
 induced by ..... 30a\*  
 cytomegalovirus infection ... 43a\*; 799  
 ethionine intoxication, rat ..... 169  
 lymphoma and leukemia ..... 35a\*  
 N-2-fluorenyldiacetamide ..... 455  
 normal and cholestatic—  
 pinocytotic activity, ductular  
 cells ..... 9a\*  
 parenchyma—cytomegalovirus  
 infection ..... 43a\*; 799  
 PAS-positive material and iron;  
 ethionine administration ..... 11a\*  
 protein deficiency ..... 25a\*  
 protein synthesis ..... 29a\*  
 ribosomes—carbon tetrachloride.. 28a\*  
 —ethionine and puromycin ..... 28a\*  
 siderosis—portacaval shunt ..... 11a\*  
 transplantable rat hepatoma ..... 10a\*  
 vasculature in cirrhosis ..... 10a\*  
 yellow fever virus, Asibi strain,  
 monkey ..... 9a\*
- Lung**  
 alveolar lining layer and  
 surfactant ..... 7a\*  
 arterial ground substance—  
 protamine effect ..... 8a\*
- cancer—histochemistry ..... 39a\*  
 chemoblastomatosis ..... 17a\*  
 epithelial hyperplasia—cortisone . 8a\*  
 immunosuppressive therapy ..... 38a\*  
 newborn ..... 46a\*  
 pulmonary hypertension ..... 37a\*  
 Wegener's granulomatosis ..... 7a\*
- Lymph node, radiated—early**  
 changes, rat ..... 16a\*
- Lymphatic bed, spleen, liver—**  
 lymphoma and leukemia ..... 35a\*
- Lymphatic system—beta-**  
 galactosidase ..... 41a\*
- Lymphatic tissue—bacterial**  
 antigen, response to ..... 727
- Lymphocytes—lymphatic beta-**  
 galactosidase ..... 41a\*
- Lymphoma, malignant—disease**  
 duration and splenic, hepatic  
 and white cell involvement .... 35a\*
- Lysosomes**  
 cell injury ..... 24a\*  
 in involution and autolysis ..... 23a\*  
 rheumatoid synovitis ..... 853
- M protein—streptococci ..... 51**
- Macrophage—metabolic**  
 mechanism in alcoholic cirrhosis 35a\*
- Macular corneal dystrophy .... 20a\***
- Malignancy—transplantable rat**  
 hepatoma ..... 10a\*
- Malignant cell—endogenous**  
 pathogen ..... 33a\*
- Malnutrition—pancreas, rabbit ... 95**
- Mandible—meat diet, rat ..... 85**
- Meat diet—mandible and teeth, rat,**  
 effect on ..... 85
- Melanogenesis ..... 19a\***
- Membrane, hyaline ..... 823**
- Membrane-particle arrays—liver**  
 cells, rat, ethionine intoxication, 169
- Membranous glomerulonephritis,**  
 idiopathic ..... 14a\*
- Mental retardation—histiocytic**  
 glycolipidosis ..... 40a\*
- Mercuric chloride—proximal**  
 convoluted tubules; response to  
 sublethal dose, rabbit ..... 31a\*
- Metabolism**  
 fat, heart—in fasting ..... 5a\*  
 macrophage and hepatocyte—in  
 alcoholic cirrhosis ..... 35a\*
- Metachromatic leukodystrophy—**  
 viscera ..... 921
- Metastatic renal calcification .... 13a\***
- Microscope, dissecting—sprue ... 585**
- Mitochondria**  
 crystalloids—alcoholic hepatitis .. 26a\*  
 liver in chronic alcoholism ..... 645  
 pyknosis—dl-serine ..... 383
- Monkey—liver; yellow fever virus. 9a\***

- Monozygotic twins—prenatal development** ..... 22a\*
- Mouse**
- amion cell tumor ..... 507
- Coxsackie virus myocarditis ..... 775
- cytomegalovirus infection ...43a\*; 799
- deoxyribonucleic acid—  
    incorporation of thymidine .... 16a\*
- germfree—lymphatic tissue ..... 747
- x-ray-induced leukemia ..... 17a\*
- immunized—tritiated antigen .... 411
- muscular dystrophy ..... 931
- polioencephalitis—virus crystal .. 29
- Mucopolysaccharide**
- acid—ventral fibroblast ..... 30a\*
- sulfate—leukocytes ..... 905
- Multiple myeloma—“flaming cell”** ..... 18a\*
- Murine amyloid, casein-induced** . 15a\*
- Muscle—lipid in muscular dystrophy** ..... 21a\*
- Muscular dystrophy**
- lipid ..... 21a\*
- mouse ..... 931
- Myelin—phagocytosis and regeneration** ..... 565
- Myeloma, multiple—“flaming cell”** ..... 18a\*
- Myocardial infarction—**  
  aminopeptidase ..... 867
- Myocarditis—Coxsackie virus** .... 775
- Myocardium**
- adenosinetriphosphatase ..... 491
- hemorrhagic shock ..... 127
- hypertrophy ..... 521
- necrosis, papain-induced, rat .... 26a\*
- open-heart surgery ..... 5a\*
- Myofibrils—cardiac muscle;**  
  adenosinetriphosphatase ..... 491
- Myofilament diameter—**  
  myocardial hypertrophy, rat .. 521
- N-2-fluorenyldiacetamide—liver, rat** ..... 455
- Narrowing, coronary arteries—**  
  collateral circulation ..... 39a\*
- Necrosis**
- myocardium—papain ..... 26a\*
- renal tubules ..... 383
- Neoplasm**
- intracranial tumor ..... 18a\*
- islet cell tumor ..... 663
- lung cancer ..... 39a\*
- malignant cell ..... 33a\*
- pituitary adenoma ..... 35a\*
- prostatic epithelium ..... 37a\*
- salivary gland tumor—onkocytes. 33a\*
- transplantable rat hepatoma .... 10a\*
- tumor diversification in  
    “progressive” malignancy ..... 19a\*
- Nephropathy**
- amphotericin B. .... 32a\*
- diabetic ..... 155
- hypertensive—renal tubule  
    regeneration ..... 41a\*
- Nephrosis, lipid** ..... 14a\*
- Nerve—regeneration; Schwann cells** 30a\*
- Neuroaxon—b-b’-**  
  iminodipropionitrile-induced  
    alterations, rat ..... 23a\*
- Neuron—Tay-Sachs disease; acid phosphatase** ..... 38a\*
- Newborn**
- respiration; pulmonary blood flow 46a\*
- thymus ..... 1a\*
- Nodules, regenerative—cirrhosis** . 31a\*
- Nontropical sprue—dissecting microscope** ..... 585
- Obstructive jaundice—glomerular changes** ..... 12a\*
- Onkocyte—salivary gland tumor** .. 33a\*
- Open-heart surgery—myocardium** 5a\*
- Opossum, fetal—antibody formation** ..... 2a\*
- Organization—thrombus, steroid-modified** ..... 4a\*
- Osteosclerosis—renal disease, children** ..... 141
- Pancreas**
- degeneration—soluble fraction  
    changes ..... 29a\*
- ductular ectasia ..... 973
- islet cell tumor ..... 663
- kwashiorkor, rabbit ..... 95
- Papain—myocardial necrosis, rat** .. 26a\*
- Parenchyma, hepatic—**  
  cytomegalovirus infection,  
    mouse .....43a\*; 799
- PAS-positive material—liver, ethionine administration** ..... 11a\*
- Permeability—blood-tissue barrier, acute inflammation** ..... 1a\*
- Phagocytosis—myelin in leukoencephalopathy, experimental** ..... 565
- Phosphatase, acid—neuron, Tay-Sachs disease** ..... 38a\*
- Pine pollen—epithelioid cell granuloma** ..... 38a\*
- Pinocytosis—ductular cells, normal and cholestatic livers** .. 9a\*
- Pituitary adenoma—argentaffin cells** ..... 35a\*
- Plaque, senile—electron microscopy** ..... 553
- Plaque, white—fibrin; atherosclerosis** ..... 255
- Plasma constituents—**  
  atherosclerosis ..... 255
- Plasma protein—ultrasonic treatment** ..... 43a\*

- Platelets—RE system blockade** .. 2a\*  
**Polioencephalitis, mouse—virus**  
   crystals ..... 2g  
**Pollen, pine—epithelioid cell**  
   granuloma ..... 38a\*  
**Polyoma virus—cell injury** ..... 26a\*  
**Portacaval shunt—hepatic**  
   siderosis ..... 11a\*  
**Precipitation, antigen-antibody—**  
   anaphylaxis ..... 88g  
**Prednisolone—protein synthesis,**  
   liver cells ..... 29a\*  
**Pregnancy—hamster; generalized**  
   Shwartzman reaction ..... 613  
**Prenatal development—twins,**  
   monozygotic and dizygotic .... 22a\*  
**Presenile dementia, Alzheimer's..** 26g  
**Primate—liver ribosomes; carbon**  
   tetrachloride effect ..... 28a\*  
**Prostate—epithelium,**  
   enzymorphology of ..... 37a\*  
**Protamine—pulmonary arterial**  
   ground substance ..... 8a\*  
**Protein**  
   basic—in leukocytes ..... 90g  
   Bence-Jones—immunologic types . 3a\*  
   deficiency—liver cell injury ..... 25a\*  
   M—streptococci ..... 51  
   malnutrition—pancreas, rabbit ... 95  
   plasma—ultrasonic treatment ..... 43a\*  
   synthesis, liver cells—systemic  
     injury and prednisolone  
       treatment ..... 29a\*  
     synthesis—subcellular apparatus .. 28a\*  
**Proteolytic enzymes—**  
   atherosclerosis ..... 40a\*  
**Proximal convoluted tubules—**  
   mercuric chloride ..... 31a\*  
**Pseudodiploid karyotypes—**  
   intracranial tumor ..... 18a\*  
**Psittacosis virus—electron**  
   microscopy ..... 44a\*  
**Pulmonary arteries—ground**  
   substance; protamine effect .... 8a\*  
**Pulmonary blood flow—respiration**  
   in newborn ..... 46a\*  
**Pulmonary complications—**  
   immunosuppressive therapy .... 38a\*  
**Pulmonary epithelial hyperplasia**  
   —cortisone ..... 8a\*  
**Pulmonary hypertension,**  
   experimental ..... 37a\*  
**Puromycin—liver ribosomes** ..... 28a\*  
**Pyelonephritis, chronic—rat** ..... 67g  
**Pyknosis, mitochondrial—dl-**  
   serine-induced ..... 383  
**Pyogenic stimulus—inflammatory**  
   exudate ..... 61
- Rabbit**  
   atherosclerosis, cholesterol—  
     amino-nitrile-induced vascular  
       injury ..... 247  
   kidney—mercuric chloride ..... 31a\*  
   levarterenol ..... 2a\*  
   pancreas—kwashiorkor ..... 95  
**Radiation**  
   cellular effect ..... 727  
   kidney, dog ..... 707  
   (See Irradiation)  
**Radiographic studies—**  
   osteosclerosis ..... 141  
**Radiosensitivity—epithelium and**  
   endothelium ..... 17a\*  
**Rapid death—adrenal** ..... 113  
**Rat**  
   allergic encephalomyelitis ..... 299  
   alpha-naphthyl isothiocyanate ... 947  
   cerebral cortex—anoxic ischemia .. 531  
   diabetic glomerulosclerosis ..... 34a\*  
   liver—anticonvulsant agent ..... 30a\*  
   —ethionine intoxication ..... 169  
   —N-2-fluorenyldiacetamide ..... 455  
   meat diet ..... 85  
   myocardial hypertrophy ..... 521  
   myocardial necrosis, papain-  
     induced ..... 26a\*  
   neuroaxonal alterations ..... 23a\*  
   pancreas, degenerating ..... 29a\*  
   protein synthesis, liver ..... 29a\*  
   pyelonephritis ..... 67g  
   radiated salivary glands and  
     lymph nodes ..... 16a\*  
   skeletal deformity—sodium  
     molybdate ..... 21a\*  
   transplantable hepatoma ..... 10a\*  
   vitamin B<sub>12</sub> deficiency ..... 73  
**Rat, Egyptian sand—diabetes**  
   mellitus ..... 20a\*  
**Reduction fragments—7S gamma**  
   globulin; Bence-Jones proteins. 3a\*  
**Regeneration**  
   myelin in leukoencephalopathy .. 565  
   nerve—Schwann cells ..... 30a\*  
   renal tubules in hypertensive  
     nephropathy, rat ..... 41a\*  
**Regenerative nodules—liver in**  
   carbon tetrachloride-induced  
     cirrhosis ..... 31a\*  
**Renal calcification**  
   electron microscopy ..... 365  
   metastasis ..... 13a\*  
**Renal coagulative necrosis—dl-**  
   serine ..... 383  
**Renal disease**  
   diagnosis by immunofluorescence.. 14a\*  
   glomerular capillary wall ..... 13a\*  
   osteosclerosis ..... 141  
**Renal hyaline arteriosclerosis** .. 349

- Renal hyperplasia, compensatory** ..... 961  
**Renal tubules—hypertensive nephropathy, rat** ..... 41a\*  
**Resorption—uterine collagen, postpartum; injury, effect of** .. 27a\*  
**Respiration—newborn** ..... 46a\*  
**Reticulo-endothelial blockade—susceptibility to infection** ..... 2a\*  
**Rheumatoid synovitis—electron microscopy** ..... 853  
**Ribosomes, liver**  
     carbon tetrachloride effect ..... 28a\*  
     ethionine and puromycin effects .. 28a\*  
**Rodent—liver ribosomes; carbon tetrachloride effect** ..... 28a\*  
**Salivary gland**  
     radiated, rat, early changes ..... 16a\*  
     tumor—onkocytes ..... 33a\*  
**Sarcoplasm—cardiac muscle; adenosinetriphosphatase** ..... 491  
**Schwann cells—nerve regeneration.** ..... 30a\*  
**Senile plaque—electron microscopy** ..... 553  
**Serine, dl-; renal necrosis** ..... 383  
**Shock**  
     anaphylactic—antigen-antibody precipitation ..... 889  
     hemorrhagic—myocardium ..... 127  
**Shwartzman phenomenon**  
     epinephrine tolerance, effects of .. 431  
     generalized—hamster, pregnant ... 613  
     trinitated endotoxin ..... 597  
**Siderosis, liver—portacaval shunt..** ..... 11a\*  
**Size, heart—chick embryo; incubation temperature** ..... 6a\*  
**Skeleton—sodium molybdate effect, rat** ..... 21a\*  
**Sodium molybdate—skeletal deformity, rat** ..... 21a\*  
**Soluble fraction—pancreas, rat** ... 29a\*  
**Sphingolipidoses** ..... 22a\*  
**Spleen—lymphoma and leukemia ..** ..... 35a\*  
**Sprue, nontropical—dissecting microscope** ..... 585  
**Staining—amyloid; Congo red and thioflavine T** ..... 15a\*  
**Steroid—thrombus organization, modification of** ..... 4a\*  
**Streptococci, group A—M-protein** ..... 51  
**Subcellular apparatus—protein synthesis** ..... 28a\*  
**Subcellular effect—radiation** ..... 727  
**Sulfated mucopolysaccharide—in leukocytes** ..... 905  
**Surfactant, lung—alveolar lining layer** ..... 7a\*  
**Swine—collateral circulation** ..... 39a\*  
**Synovial membrane, rheumatoid.** ..... 853  
**Tay-Sachs disease—acid phosphatase in neurons** ..... 38a\*  
**Teeth—meat diet, rat** ..... 85  
**Temperature, incubation—heart size, chick embryo** ..... 6a\*  
**Tetracyclines—toxicity** ..... 44a\*  
**Thioflavine T stain—amyloid** .... 15a\*  
**Thrombus organization, steroid-modified** ..... 4a\*  
**Thymidine—DNA, mouse organs** ... 16a\*  
**Thymus, newborn—function** ..... 1a\*  
**Thyroid—endemic goiter** ..... 839  
**Thyroiditis—guinea pig** ..... 20a\*  
**Tissue culture**  
     ECHO-9 virus ..... I; 215  
     yellow fever virus, Asibi strain .. 9a\*  
**Tolerance, epinephrine—Shwartzman phenomenon, effects on** ..... 431  
**Toxicity—tetracyclines** ..... 44a\*  
**Tritiated antigen—cellular distribution** ..... 411  
**Tritiated endotoxin**  
     blood elements, localization in .... 401  
     Shwartzman reaction ..... 597  
**Tubules, proximal, convoluted—mercuric chloride, sublethal dose** ..... 31a\*  
**Tumor**  
     intracranial—chromosome patterns ..... 18a\*  
     “progressive” malignancy and diversification ..... 19a\*  
     salivary gland—onkocytes ..... 33a\*  
     with bone ..... 507  
**Tumoral calcinosis—connective tissue** ..... 41a\*  
**Twins, monozygotic and dizygotic—prenatal development** ..... 22a\*  
**Ultra-soft x-rays—aortic calcification** ..... 4a\*  
**Ultrasound—plasma protein properties** ..... 43a\*  
**Ultrastructure—(See Electron microscopy)**  
     Uterus—collagen, postpartum resorption of ..... 27a\*  
**Vascular injury—amino-nitrile; rabbit** ..... 247  
**Vasculature, hepatic—cirrhosis** ... 10a\*  
**Vasodilation, coronary arteries—collateral circulation** ..... 39a\*  
**Virchow—concept of amyloid and cellulose** ..... 42a\*  
**Virus**  
     crystal formation, polioccephalitis ..... 29  
     cytomegalic—mouse ..... 43a\*; 799  
     ECHO-9—tissue culture ..... I; 215  
     polyoma—cellular injury ..... 26a\*  
     psittacosis—electron microscopy .. 44a\*  
     yellow fever, Asibi strain ..... 9a\*  
**Virus assay—Coxsackie myocarditis** ..... 775

**Viscera**

glycolipidosis .....	40a*
metachromatic leukodystrophy ...	921
Vitamin B <sub>12</sub> —postnatal deficiency,	
rat .....	73
Wegener's granulomatosis .....	7a*
White cell content, blood—in	
lymphoma and leukemia .....	35a*
White plaque—atherosclerosis ....	255
Wine—hemochromatosis .....	10a*

**X-ray microscopy**

aortic calcification .....	4a*
renal effects, cholecystographic	
medium (bunamiodyl) .....	13a*
X-rays—leukemia induction,	
germfree mice .....	17a*
Yellow fever, Asibi strain—in liver	
and tissue culture cells .....	9a*
Zak's chemoblastomatosis .....	17a*
Zonal lesions, myocardium—	
hemorrhagic shock .....	127
